Schedule A Import Classifications
Correlated with TSUSA, SITC, and
FT 990 Codes

U.S. FOREIGN TRADE STATISTICS

Classifications and Cross-Classifications

1980

This section shows the outline of *Schedule A, SITC-Based Statistical Classification of Commodities Imported into the United States*, with abbreviated commodity descriptions for the 1-, 2-, 3-, and 4-digit levels of summarization. For the detailed 7-digit Schedule A classifications both abbreviated commodity descriptions and unit of quantity are shown, as well as the individual TSUSA numbers which are assigned to the Schedule A classification and the most detailed level of the FT 990 code (see Section 10).

Schedule A rearranges and summarizes the approximately 11,300 commodity classifications of the *Tariff Schedules of the United States Annotated* (TSUSA) into approximately 3,100 7-digit Schedule A classifications within the framework of the *Standard International Trade Classification (SITC), Revision 2*[1], effective with the statistics for January 1978. (Prior to January 1978, Schedule A was based upon the former SITC, revised.)

The numbering system of Schedule A is basically the same as the SITC. Whenever Schedule A 1-, 2-, or 3-digit numbers are the same as those in the SITC, it is believed that for most statistical purposes the commodity coverage can be considered essentially comparable, although the coverage is not always identical. Reasonable comparability for statistical purposes can also be expected, in most cases, when 5-digit Schedule A numbers are identical with SITC numbers. At the 4-digit level, the retention of an SITC number in Schedule A indicates similarity of coverage but the degree of comparability may in some cases be less at the 4-digit level for identical numbers in the two systems than at the 5-digit level. When a non-SITC number is used as the third, fourth, or fifth digit of a Schedule A number, comparability of coverage with any given SITC classification at the same level ordinarily does not exist, but there usually will be comparability involving combinations of the affected Schedule A or SITC classifications.

The sixth and seventh digits are added to provide more detailed breakdowns where such detail appears to be justified to reflect U.S. import trade characteristics. To this extent the detail shown is determined largely on the magnitude of trade in the various TSUSA commodities arranged within the SITC framework, with the two objectives of providing detailed data for commodities important in the U.S. import trade while also providing data in terms of the SITC outline which are comparable, insofar as possible, with foreign trade statistics compiled by other trading nations.

In the column labeled "SITC Code" where Schedule A comparability does not exist at the second, third, fouth, or fifth digit levels of the SITC code in Rev. 2, "0's" have been added to indicate the level of comparability. These are preliminary code assignments which will be updated in 1981.

Section 8

End-Use Import Classifications
Correlated with TSUSA Numbers

U.S. FOREIGN TRADE STATISTICS

Classifications and Cross-Classifications

1980

This section shows the outline of the end-use classification scheme for recording U.S. import trade data, with the commodity description for each end-use category and the 7-digit *Tariff Schedules of the United States Annotated* (TSUSA) numbers assigned to each end-use category at the most detailed (4-digit) level. (See Section 6 for abbreviated TSUSA descriptions.)

The classification of U.S. import trade into broad summary commodity categories based on a concept of end-use demand was originated and developed a number of years ago by the Merchandise Trade Branch, Balance of Payments Division, Bureau of Economic Analysis (BEA). It represents a regrouping of the 11,300 individual commodity numbers contained in the basic import commodity classification schedule (TSUSA) into 116 4-digit summary commodity groupings. The 4-digit coding system permits combining of the 116 groupings into broader and broader subcategories at the 3-, 2-, and 1-digit level. At the broadest (1-digit) level, the principal end-use categories of imports emerge as follows:

0 Food, feeds, and beverages
1 Industrial supplies and materials
2 Capital goods, except automotive
3 Automotive vehicles, parts, and engines
4 Consumer goods (nonfood), except automotive
5 Imports, n.s.p.f.

Data for all the 116 import end-use groupings, together with the 3-, 2-, and 1-digit subcategories and categories into which they combine, are presented in tables I-7, I-12, and I-13 of Report *FT 990, Highlights of U.S. Export and Import Trade,* and in Tabulation *IM 171, U.S. General Imports of Merchandise, "End-Use...."* End-use demand has fundamentally determined the assignment and regrouping of the basic TSUSA import commodity classifications into major summary categories, but within each major grouping there are subdivisions intended to reflect the physical nature of a commodity or its stage of production.

For a more complete description of the end-use system, see *"U.S. Merchandise Trade Exports and Imports—1965-1976, Classified by BEA End-Use Categories."*

Section 9

SIC-Based Import Product Classifications
Correlated with TSUSA Numbers

U.S. FOREIGN TRADE STATISTICS

Classifications and Cross-Classifications

1980

This section shows the rearrangement of approximately 11,300 statistical classification numbers contained in *Tariff Schedules of the United States Annotated* (TSUSA), into approximately 1,700 8-digit commodity classes based on the *Standard Industrial Classification* (SIC). (See Section 6 for abbreviated TSUSA descriptions.) Data in this arrangement are presented in *FT 210, U.S. Imports for Consumption and General Imports, SIC-Based Products by World Area,* and in Tabulation *IA-276, U.S. Imports of Merchandise for Consumption and General Imports, SIC-Based 8-digit Product Codes by Country of Origin.*

For the purpose of relating imports to output, the 5-digit product classes of the *Numerical List of Manufactured Products, 1977 Census of Manufactures* (MC77-R-1) were used as the starting point for manufactured products, and the 4-digit industry codes of the SIC, subdivided into 5-digit homogeneous classes of commodities, were used as the starting point for nonmanufactured products. Individual TSUSA numbers were then assigned to the SIC product class containing the same products as the TSUSA code. In instances where TSUSA numbers included items which should be classified in two or more SIC output product codes, an assignment was made to the SIC output product code to which the principal content of the TSUSA numbers appeared to belong, where such an assignment would not significantly overcount the classification to which the TSUSA number was assigned or significantly undercount others in which it partly belonged. Where is appeared that assigning the entire content of a TSUSA number to a single SIC output product code would seriously distort the classification, the principal 5-digit output product codes were combined for this presentation and the TSUSA number assigned to the combination. Such 5-digit combinations can be identified by the 6th digit of the code which can be interpreted as follows:

"O"	No combination
"A"	All within the same 4-digit class
"B"	All within the same 3-digit class but some different 4-digit classes
"C, H"	All within the same 2-digit class but some different 3-digit classes
"D, J"	All within the same division but some different 2-digit classes
"E"	Within different divisions
"X"	All 5-digit classes within the same 4-digit (or 3-digit) are included; A, B, and C, in the 5-digit for numbering sequence only.

The 7th and 8th digits are further subdivisions of the 6-digit codes which have been made to yield import classifications comparable to output classifications within the framework of SIC.

Since there are basic structural differences between TSUSA and SIC, a complete and precise presentation of imports in terms of the output commodity classification based on the SIC is not possible. However, this arrangement does identify the areas where imports and output are most comparable, and presents the information in convenient form for further summarization to 4-digit, 3-digit, and 2-digit SIC levels.

Section 10

Selected Schedule A Import
Commodity Groupings and Commodities
Correlated with the Schedule A Numbers

U.S. FOREIGN TRADE STATISTICS

Classifications and Cross-Classifications

1980

This section relates commodity number composition of the selected commodity groupings and commodities described in import commodity summary tables I-2, I-3, I-4, I-9, and I-10 of Report *FT 990, Highlights of U.S. Export and Import Trade* to the appropriate numbers in *Schedule A, SITC-Based Statistical Classification of Commodities Imported into the United States.* In general, the data presented in the import commodity-oriented summary tables include Schedule A section (1-digit) totals, selected division (2-digit), group (3-digit), and subgroup (4-digit) totals, and totals, for leading commodities (7-digit), or combinations of commodities. (See Section 7 for abbreviated Schedule A descriptions.) The data presented in terms of these categories are intended to reflect the current pattern or highlights of U.S. import trade.

Section 10. Selected Schedule A Import Commodity Groupings and Commodities Correlated With the Schedule A Numbers

Code number	Commodity description	Schedule A section, group, subgroup, or item numbers
010	FOOD AND LIVE ANIMALS	0
015	CATTLE, EXCEPT FOR BREEDING	001.1040,001.1055
020	MEAT AND MEAT PREPARATIONS	01

Schedule C-I—Classification of Country and Territory Designations for U.S. Import Statistics

C. In Numerical Arrangement
D. In Alphabetic Arrangement

U.S. FOREIGN TRADE STATISTICS

Classifications and Cross-Classifications

1980

Schedule C-E

Schedule C-E is the classification schedule which contains the country and territory designations used in compiling data regarding the country of destination for U.S. export shipments. Information regarding the country of destination for exports is required to be reported by exporters for shipments leaving the United States. Country of destination data are compiled along with commodity and other data regarding foreign trade transactions and the country information is included in statistical reports released by the Bureau of the Census.

To facilitate the reporting and compilation of data regarding the country of destination for U.S. export statistics, Schedule C-E, in numeric arrangement, lists each country and territory designation for which separate foreign trade statistics are compiled, along with three-digit codes assigned to the country designations.

Abbreviated country designations, which are shown in lieu of complete country names in some foreign trade reports because of limited space, are also given in Schedule C-E. To provide clarification of the coverage of particular designations, listings are included of the countries, adjacent provinces, territories, islands or other areas considered a part of the country designations for statistical purposes. The foreign country designations are arranged in the numeric schedule by continent generally from north to south and west to east. Codes for Puerto Rico and U.S. possessions are shown at the end of part A of Schedule C-E. A listing in alphabetic arrangement of the countries, territories, islands, etc., with their numeric codes appears in part B of Schedule C-E. The classifications shown in this schedule are those in effect through December 1980 and are the same as those shown in the January 1, 1976, edition of Schedule C-E, updated through December 1980.

While Schedule C-E is primarily a geographic classification of countries, its structure makes it possible to obtain summarization of data in terms of various economic as well as geographic groupings. For a list of such groupings for which foreign trade data are currently being compiled, see Section 12, World Areas and Countries.

Schedule C-E is published as a part of *Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States.*

Section 11. Schedule C-E—Classification of Country and Territory Designations for U.S. Export Statistics

A. Numeric Arrangement

Schedule C-E code	Country and territory designation[1]	Abbreviated designation[1]
	NORTH AMERICA	
100	United States of America	USA
101	Greenland	Greenld
122	Canada	Canada
161	St. Pierre and Miquelon	SP Mqel
201	Mexico	Mexico
	Includes Isla de Cozumel and Islas Revillagigedo.	
205	Guatemala	Gustmal
208	Belize	Belize
211	El Salvador	Salvadr
215	Honduras	Hondura
	Includes Islas de la Bahia and the Swan Islands.	
219	Nicaragua	Nicarag
223	Costa Rica	C Rica
225	Panama (including Canal Zone)[10]	Panama
232	Bermuda	Bermuda
236	Bahamas	Bahamas
	Includes Grand Bahama, Grest Abaco, Harbour Island, Eleuthers, New Providence, Andros, Great Exuma, Long Island, Great Inagua, and associated small islands.	
239	Cuba	Cuba
	Includes Isla de Pinos.	
241	Jamaica	Jamaica
	Includes Morant Cays and Pedro Cays.	
243	Turks and Caicos Islands	Turk Is
244	Cayman Islands	Cayman
245	Haiti	Haiti
	Includes Ile de la Gonave and Tortuga Island.	
247	Dominican Republic	Dom Rep
248	Leeward and Windward Islands	Lw Ww I
	Leeward Islands: British Virgin Islands, including Anegada, Jost Van Dyke, Tortola, and Virgin Gorda; St. Christopher-Nevis-Anguilla, including Sombrero Island; Antigua, including Barbuda and Redonda; and Montserrat. Windward Islands: Dominica; St. Lucia; St. Vincent, including the northern Grenadine Islands; and Grenada, including the southern Grenadine Islands.

951	American Samoa (including Tutuila Island and dependencies)	Am Sam

[1]The country and territory designations in Schedule C-E have been established for statistical purposes and should be used in reporting country of destination information for export shipments.

[2]New classification effective January 1977. North Vietnam and South Vietnam previously reported separately under codes 550 and 551, respectively.

[3]Country designation changed effective January 1979. Formerly shown as "Peoples Republic of China (Peking)".

[4]Country designation changed effective January 1979. Formerly shown as "Republic of China".

[5]Effective January 1978, code for Spanish Africa, n.e.c. changed from 736 to 735. Previously included Spanish Sahara, classified separately as code 737 and name changed to Western Sahara effective January 1978.

[6]Country name changed effective September, 1979. Formerly named "Central African Empire".

[7]Country name changed effective January 1978. Formerly named "Afars and Issas".

[8]New classification "Comoros", code 789, effective January 1978. Formerly named "Comoro Islands" and included under code 790, French Indian Ocean Areas.

[9]Country name changed effective January 1978. Formerly named "South-West Africa (Namibia)".

[10]Effective October, 1979, Panama includes the area formerly separately provided for as the Canal Zone.

Schedule C-I

Schedule C-I is the classification schedule which contains the country designations used in compiling the U.S. import statistics. Information regarding the country of origin for imports is required to be reported by importers for shipments entering the United States. Country of origin data are compiled along with commodity and other data regarding foreign trade transactions and the country information is included in statistical reports released by the Bureau of the Census.

Effective January 1, 1976, a four-digit country coding system replaced the three-digit codes which were previously used to report and compile information on the country of origin of merchandise imported into the United States. The expansion from three-digit to four-digit codes was necessary in order to create break-outs for certain country subdivisions or territories. These break-outs enable the Bureau of the Census to compile separate import data for countries and territories designated as beneficiary developing countries for purposes of the Generalized System of Preferences, in accordance with the provisions of Title V of the Trade Act of 1974.

Explanation of Four-digit Codes

In expanding the country codes, the three-digit codes in effect prior to January 1, 1976, have been maintained to the fullest possible extent.

The fourth digits of the codes indicate the following:

"0" – A zero has been used as the fourth digit if the following conditions exist:

(a) In cases where a country or territory has not been subdivided the three-digit code is shown with a zero as the fourth digit.

(b) Where a substantial change is to be made in the geographical coverage of a previous classification, a new three-digit code has been assigned with a zero as the fourth digit.

(c) In cases where beneficiary developing areas were classified separately prior to January 1, 1976, a zero has been assigned as the fourth digit.

"1" – This digit has been used to indicate that, although the country name has not been changed, the geographical coverage of the classification has been somewhat reduced and a new code (or codes) with the same first three digits has been established for territory previously reported as a part of the major country.

"2 through 9" – These digits indicate that an area, which was not separately classified before, has been designated as a beneficiary developing country or territory for purposes of the Generalized System of Preferences.

Abbreviated country designations, which are used in lieu of complete country names in some foreign trade reports because of limited space are also shown. To provide clarification of the coverage of particular designations, listings are included of the countries, adjacent provinces, territories, islands, or other areas which are considered a part of the country designation for statistical purposes. The foreign country designations are arranged in the numeric schedule by continent and are listed in sequence within each continent generally from north to south and west to east. Codes for Puerto Rico and U.S. possessions are shown at the end of part C of this schedule. A listing in alphabetic arrangement of the countries, territories, islands, etc., with their numeric codes appears in part D of this section. The classifications shown in parts C and D are those in effect through December 1980. These are the same as the classifications shown January 1, 1976, edition of Schedule C-I, except updated through December 1980.

While Schedule C-I is primarily a geographic classification of countries, its structure makes it possible to obtain summarizations of data in terms of various economic as well as geographic groupings. For a list of such groupings for which foreign trade data are currently being compiled, see Section 12, World Areas and Countries.

Schedules C-I is included as Annex B in the *Tariff Schedules of the United States Annotated.*

Section 11. Schedule C-l.—Classification of Country and Territory Designations for U.S. Import Statistics

C. Numeric Arrangement

Schedule C-1 code	Country and territory designation[1,2]	Abbrevisted designation[1,2]
	NORTH AMERICA	
100.0	United States of America	USA

[1]These country designations are for statistical purposes only and are not intended for use in conforming to the marking provisions shown in Section 304 of the Tariff Act of 1930, as amended. The country designations in Schedule C-I should be shown in all cases where statistical information is required to be furnished for import shipments (e.g., on import entries and import invoices) unless a more specific area is required to be shown for other purposes.

[2]In many foreign trade reports, separate data are not shown for classifications with the numbers 2 through 9 as the fourth digit of the code. Data for such classifications may be (a) included in the data shown for a preceding code having the same first three digits and ending in the number 1 or (b) combined with other adjacent codes with the same first three digits and presented under a general name not appearing in this schedule. See footnotes to individual classifications for specific information regarding the presentation of statistical data for that classification.

[3]Effective October 1979, Panama includes the area formerly separately provided for as The Canal Zone under country code 227.0.

[4]Included in data shown for "Leeward and Windward Islands" in some foreign trade statistical reports.

[5]New classification effective January 1977. North Vietnam and South Vietnam previously reported separately under codes 550.0 and 551.0, respectively.

[6]Includes the former Portuguese Timor, annexed July 17, 1976, formerly shown separately under code 568.4.

[7]Included in data shown for "Southern Asia, n.e.c." in some foreign trade statistical reports.

[8]Country designation changed effective January 1979. Formerly shown as "Peoples Republic of China (Peking)".

[9]Country designation changed effective January 1979. Formerly shown as "Republic of China".

[10]Norfolk Island, Cocos (Keeling) Islands, Christmas Island, and Heard Island and McDonald Island included in data for Australia in some foreign trade statistical reports.

[11]Cook Islands, Tokelau Islands, and Niue included in data for New Zealand in some foreign trade statistical reports.

[12]Included in data shown for "Southern Pacific Islands" in some foreign trade statistical reports. Gilbert Islands and Tuvalu (formerly the Ellice Islands) reported separately effective September 1, 1976; previously reported together as the Gilbert and Ellice Islands, code 622.2.

[13]Included in data shown for "French Pacific Islands" in some foreign trade statistical reports.

[14]Included in data shown for "Other Pacific Islands, n.e.c." in some foreign trade statistical reports.

[15]Effective January 1978, code for Spanish Africa, n.e.c. changed from 731.6 to 735.0.

[16]Name changed from Spanish Sahara to Western Sahara and code changed from 736.2 to 737.0, effective January 1978.

[17]Included in data shown for "Western Africa, n.e.c." in some foreign trade statistical reports.

[18]New classification "Comoros", code 789.0, effective January 1978. Formerly named "Comoro Islands" and reported under code 790.2.

[19]Effective January 1978, country code for French Indian Ocean Areas changed from 790.1 to 790.0.

Section 12

World Areas and Countries

U.S. FOREIGN TRADE STATISTICS

Classifications and Cross-Classifications

1980

In order to meet the needs of many users of foreign trade statistics, data are compiled showing U.S. imports from and exports to various geographic and economic world areas. The areas for which statistics are compiled and the individual countries included in each area are shown on the list presented in this section. The areas represent groupings of individual countries classified separately in *Schedules C-E, Classification of Country and Territory Designations for U.S. Export Statistics* and *C-I, Classification of Country and Territory Designations for U.S. Import Statistics*, with the exceptions of Canada, the United Kingdom, and Japan, which are treated as separate individual areas. (Schedule C-E and C-I are presented in Section 11.) The areas and countries shown are those in effect as of December 1980.

The statistics for world areas are obtained by summarizing the data reported for individual countries into the specified geographic and economic groups. Totals are provided for six major geographic areas of the world: Western Hemisphere, Western Europe, Communist Areas in Europe, Asia, Australia and Oceania, and Africa. Three of the major areas (Western Hemisphere, Western Europe, and Asia) are divided into additional groupings, some of which are further subdivided into smaller categories. Thus, Western Europe is divided into two primary categories: (1) Organization for Economic Cooperation and Development Countries and (2) Other Western Europe. The OECD category is divided into two categories: (1) European Economic Community, and (2) Other OECD countries. The European Economic Community is further divided into three sub-categories: (1) Original EEC Countries, (2) United Kingdom, and (3) Other EEC Countries. Similar breakdowns into primary and secondary categories occur within the other major areas of Western Hemisphere and Asia. In imports, the designation UNIDENTIFIED COUNTRIES is used to reflect imports from countries which could not be identified because of illegible reporting on import entries for low-valued shipments. In exports, the designation UNIDENTIFIED COUNTRIES is used to reflect transshipments of grains and oilseeds through Canada for which the country of ultimate destination is not known at the time of shipment from the United States.

Current monthly and cumulative information on U.S. trade with individual world areas is presented in Report *FT 990, Highlights of U.S. Export and Import Trade.* Annual data are presented in the following reports: *FT 450, U.S. Exports, Schedule E Commodity Groupings, World Area, Country, and Method of Transportation; FT 455, U.S. Exports, World Area, Country, Schedule E Commodity Groupings, and Method of Transportation; FT 150, U.S. General Imports, Schedule A Commodity Groupings, World Area, Country, and Method of Transportation;* and *FT 155, U.S. General Imports, World Area, Country, Schedule A Commodity Groupings, and Method of Transportation.*

Schedule D—Classification of U.S. Customs Districts and Ports for U.S. Foreign Trade Statistics

A. In Numerical Arrangement
B. In Alphabetic Arrangement

U.S. FOREIGN TRADE STATISTICS

Classifications and Cross-Classifications

1980

Schedule D provides a list of U.S. Customs districts, the ports included under each district, and the corresponding numeric codes used in compiling the U.S. foreign trade statistics. The schedule contains a code for each official U.S. Customs district and port, with some additional codes provided to meet specific compiling requirements of the foreign trade statistical program. The underlined port of each district is the headquarters port for the district.

The district and port classifications shown are those in effect December 31, 1980 (classifications published in the January 1, 1978, edition of the schedule, as amended by Public Bulletins D-1 through D-8). In Part A, the classifications are listed in the order of the numeric Customs district and port codes, while Part B lists the ports in alphabetic arrangement. A list of the nine official U.S. Customs regions, showing the districts included in each region, is also included in Part A. Totals for import and export trade through individual Customs regions and/or districts are published monthly in Report *FT 990, Highlights of U.S. Export and Import Trade.* More detailed Customs district information is presented in monthly import and export tabulations (identified as IM and EM, respectively) as follows: IM 154 and EM 563, in district by country by commodity arrangement; IM 136 and EM 531, in country by commodity by district arrangement; and IM 145 and EM 522, in commodity by country by district arrangement.

A list of the six U.S. coastal districts, showing the Customs districts or ports included under each coastal district, also appears at the end of Part B. Waterborne trade data for U.S. coastal districts appear in Report FT 985 as well as import tabulations SM 311/311 IT and export tabulations SM 711/711 IT. Further information regarding the availability of any of the above-mentioned data may be obtained from Department of Commerce Field Offices or the Bureau of the Census.

Schedule D is published as a part of *Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States,* and is also included as Annex A in *Tariff Schedules of the United States Annotated.*

- 06. Wilkes-Barre/Scranton, Pa.

[1]The first code shown is currently used by the Bureau of the Census in the compilation of the foreign trade statistics; the second code, assigned for U.S. Customs Service operations, may be used on import entries and export declarations filed for transactions through the specified ports. In Bureau of the Census statistical reports, New York City Customs District totals represent a summarization for the five ports. Newark and Perth Amboy are included in the New York port (10-01) in the shipping statistics presented in reports such as FT 985, SM 305, and SM 705.

Section 14

Schedule K—Classification of
Foreign Ports by Geographic
Trade Area and Country

A. In Numerical Arrangement
B. In Alphabetic Arrangement
C. In 4—Digit Country/Area Arrangement

U.S. FOREIGN TRADE STATISTICS

Classifications and Cross-Classifications

1980

This schedule lists the major ports of the world directly handling waterborne shipments in the foreign trade of the United States and the numeric code numbers by which such ports are designated in tabulations such as SM 305 and 705. The ports are grouped according to the country arrangement in *Schedule C-E, Classification of Country and Territory Designations for U.S. Export Statistics* and *Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics,* effective as of January 1978, updated by Public Bulletins 1 through 10.

Within various countries and regional areas, groups of individual ports have been combined under single code numbers described as "all other ports." The ports listed in these basket categories represent smaller ports whose participation in the foreign trade to date have been of insufficient importance to warrant the compilation and presentation of separate data. For some countries more than one of these basket categories have been listed to facilitate the segregation of traffic in terms of trade areas or trade routes.

Under certain conditions, a vessel has the option of discharging cargo at one of two or more foreign ports. For some foreign areas, optional discharge port cargo represents a significant amount of total cargo unladen. The more important of the optional port combinations are assigned separate code numbers and are referred to as "optional ports in..."

In order to furnish further identification of ports in Canada and the Philippines, each of which contains a particularly large number of ports engaged in waterborne traffic with the United States, abbreviations have been inserted beside the port names to show the Canadian province or territory and, in the case of the Philippines, to show the island in which the designated ports are located. Small islands located off the shore of major islands in the Philippine Archipelago have been generally identified by the abbreviation for the larger islands. The abbreviations used are as follows:

CANADA

BC	British Columbia	ONT	Ontario
CBI	Cape Breton Island	PEI	Prince Edward Island
LAB	Labrador	QUE	Quebec
MAN	Manitoba	YT	Yukon Territory
NB	New Brunswick	X	High or Deep Sea (for fishing vessels)
NFLD	Newfoundland		
NS	Nova Scotia		

PHILIPPINES

BAS	Basilan	MAS	Masbate
CEB	Cebu	POL	Polillo
JOL	Jolo	POR	Poro
LEY	Leyte	ROM	Romblon
LUZ	Luzon		

Shown in this section are the 4-digit "country/area" codes and descriptions used in compiling the tonnage data which are released in tabulations SM 705, Supplement and SM 711, Supplement. These tabulations contain shipping weight data for U.S. waterborne exports of Department of Defense Military Assistance Program—Grant-Aid-Shipments combined with commercial "Special Category" shipments.

Section 15

Schedule R—Code Classification and Definitions of Foreign Trade Areas

U.S. FOREIGN TRADE STATISTICS

Classifications and Cross-Classifications

1980

This schedule lists the foreign trade areas which appear in Report *FT 985, U.S. Waterborne Exports and General Imports,* and in the waterborne tabulations SM 311 and SM 711. The trade areas are defined in terms of the foreign ports shown in the 1979 edition of *Schedule K, Classification of Foreign Ports by Geographic Trade Area and Country,* updated by Public Bulletin K-1. Brief descriptions are provided of the general geographic limits covered by the various trade areas as well as the individual foreign port ranges which are included under each.

Section 15. Schedule R--Classification and Definitions of Foreign Trade Areas

Code	Trade area and limits	Schedule "K" foreign port ranges	Subdivision	
			Code	Trade area and description
01	CARIBBEAN			
	The Caribbean Sea fringe excluding Mexico.	20500-20513 20800, 20801 21500-21543 21900-21925 22300-22313 22500-22565 23201-30145 30700-31700 91141, 91125	019	East Coast of Guatemala Belize East Coast of Honduras East Coast of Nicaragua East Coast of Costa Rica East Coast of Panama Bermuda, Bahamas, Cuba, Jamaica, Turks and Caicos Islands, Haiti, Dominican Republic, Leeward and Windward Islands, Barbados, Trinidad and Tobago, Netherlands Antilles (formerly Curacao, N.W.I.) French West Indies (including Guadeloupe and Martinique), and the northern Coast of Colombia fronting on the Caribbean Venezuela, Guyana, Surinam (Netherlands Guiana), and French Guiana Virgin Islands of the United States
02	EAST COAST OF SOUTH AMERICA	30198	021	Colombia Amazon Region
	From Cape Orange at the northernmost part of Brazil to Cape Horn.	35107-37200		Brazil, Paraguay, Uruguay, Argentina, and the Falkland Islands (including Sandwich Islands, South Georgia, South Orkneys, and South Shetlands)

Commodity codes		Commodity description	Unit of quantity
Schedule E number	Schedule B number		
713.1120	660.4822	Internal combustion engines and parts thereof for aircraft, military, new or used--SC	No.
714.6010	660.4922	Jet and gas turbines for aircraft, military, new--SC	No.
714.6020	660.4925	Jet and gas turbines for aircraft, military, used--SC	No.
714.6050	660.4970	Missile and rocket engines and turbines--SC	No.
714.9125	660.5480	Parts of missile and rocket engines and turbines--SC	-
782.1004	692.0504	Automobile trucks (except truck tractors) gasoline fueled, 6,000 pounds g.v.w. and less, military, new--SC	No.
782.1008	692.0508	Automobile trucks (except truck tractors) gasoline fueled, 6,001-10,000 pounds g.v.w., military, new--SC	No.
782.1012	692.0512	Automobile trucks (except truck tractors) gasoline fueled, 10,001-14,000 pounds g.v.w., military, new--SC	No.
782.1016	692.0516	Automobile trucks (except truck tractors) gasoline fueled, 14,001-16,000 pounds g.v.w., military, new--SC	No.
782.1020	692.0520	Automobile trucks (except truck tractors) gasoline fueled, 16,001-19,500 pounds g.v.w., military, new--SC	No.
782.1024	692.0524	Automobile trucks (except truck tractors) gasoline fueled, 19,501-26,000 pounds g.v.w., military, new--SC	No.
782.1028	692.0530	Automobile trucks (except truck tractors) gasoline fueled, 26,001-33,000 pounds g.v.w., military, new--SC	No.
782.1032	692.0534	Automobile trucks (except truck tractors) gasoline fueled, 33,001-44,000 pounds g.v.w., military, new--SC	No.
782.1036	692.0538	Automobile trucks (except truck tractors) gasoline fueled, over 44,000 pounds g.v.w., military, new--SC	No.
782.1040	692.0542	Automobile trucks, other fuels (including diesel) 16,000 pounds g.v.w. and less, military, new--SC	No.
782.1044	692.0546	Automobile trucks, other fuels (including diesel) 16,001-26,000 pounds g.v.w., military, new--SC	No.
782.1048	692.0550	Automobile trucks, other fuels (including diesel) 26,001-33,000 pounds g.v.w., military, new--SC	No.
782.1052	692.0554	Automobile trucks, other fuels (including diesel) 33,001-44,000 pounds g.v.w., military, new--SC	No.
782.1056	692.0580	Automobile trucks, other fuels (including diesel) over 40,000 pounds g.v.w., military, new--SC	No.
782.2070	692.1670	Special-purpose military vehicles, new or used--SC	No.
783.2020	692.0820	Automobile truck tractors, gasoline fueled, 44,000 pounds g.v.w. and less, military, new--SC	No.
783.2040	692.0840	Automobile truck tractors, gasoline fueled, over 44,000 pounds g.v.w., military, new--SC	No.
783.2060	692.0860	Automobile truck tractors, other fuels (including diesel) 44,000 pounds g.v.w. and less, military, new--SC	No.
783.2080	692.0880	Automobile truck tractors, other fuels (including diesel) over 44,000 pounds g.v.w., military, new--SC	No.
792.5005	694.4009	Airplanes, military, used or rebuilt--SC	No.
792.5010	694.4011	Airplanes, rotary wing, military, new--SC	No.
792.5015	694.4013	Bombers, fixed wing, military, new--SC	No.
792.5020	694.4015	Fighters (including bomber-fighters), fixed wing, military, new--SC	No.
792.5025	694.4017	Cargo transports, fixed wing, military, new--SC	No.
792.5030	694.4019	Military aircraft, n.s.p.f., new--SC	No.
792.8060	694.5120	Spacecraft, balloons, gliders, kites, etc., military--SC	-
793.1000	696.0701	Ships, boats, and other vessels, military--SC	-
871.0510	708.5410	Binoculars designed for use with infrared light--SC	No.
871.0530	708.5430	Telescopic gun sights, and parts thereof--SC	-
871.0540	708.5440	Refracting or reflecting telescope (except binoculars) and astronomical instruments, n.s.p.f. designed for use with infrared light--SC	-

- Represents no unit of quantity required.

Appendix A. Special Category Classifications—Continued

Commodity codes		Commodity description	Unit of quantity
Schedule E number	Schedule B number		
871.0940	708.9200	Firearm and missile fire control and sighting equipment, n.s.p.f., and parts thereof, n.s.p.f.--SC	-
951.0110	692.4505	Tanks and other self-propelled armored military vehicles, whether or not fitted with weapons, and parts thereof, n.s.p.f., tracked, including half-tracked--SC	No.
951.0120	692.4515	Tanks and other self-propelled armored military vehicles, whether or not fitted with weapons, and parts thereof, n.s.p.f., wheeled--SC	No.
951.0130	692.4520	Parts for tanks and other self-propelled armored military vehicles--SC	-
951.0205	730.8210	Guns, howitzers and mortars having a bore diameter of more than 30-mm. (including systems), other than self-propelled--SC	No.
951.0215	730.8220	Guns, howitzers and mortars having a bore diameter of more than 30-mm. (including systems), self-propelled--SC	No.
951.0225	730.2220	Rifles designed for military use--SC	No.
951.0235	730.8230	Machine guns having a bore diameter of 30-mm. or less--SC	No.
951.0245	730.8235	Other military firearms having a bore diameter of 30-mm. or less (except systems totalling more than 30-mm.)--SC	No.
951.0255	730.8250	Missile and rocket launchers; flame throwers; etc. and similar military projectors, except guns, howitzers, and mortars--SC	No.
951.0400	730.0500	Swords, bayonets, and other side arms (except firearms), parts thereof, and scabbards and sheaths therefor--SC	-
951.0500	730.1400	Pistols and revolvers--SC	No.
951.0610	730.9510	Guided missiles--SC	No.
951.0665	730.9530	Parts for guided missiles, including components and subassemblies--SC	-
951.0650	730.9520	Bombs, grenades, torpedoes, mines, and similar munitions of war--SC	-
951.0655	730.9540	Parts for bombs, grenades, torpedoes, mines, and similar munitions of war--SC	-
951.0660	730.9605	Ammunition (containing a projectile) suitable for use in pistols and revolvers--SC	No.
951.0665	730.9610	Ammunition for military weapons having a bore diameter of more than 30-mm.--SC	No.
951.0670	730.9620	Ammunition for military weapons having a bore diameter of 30-mm. or less--SC	No.
951.0680	730.9655	Parts of ammunition suitable for use in pistols and revolvers designed to contain a projectile--SC	-
951.0685	730.9660	Parts of military ammunition for weapons having a bore diameter of more than 30-mm.--SC	-
951.0690	730.9670	Parts of military ammunition for weapons having a bore diameter of 30-mm. or less--SC	-
951.0910	730.8225	Parts for guns, howitzers and mortars having a bore diameter of more than 30-mm.--SC	-
951.0920	730.7820	Parts for pistols and revolvers; and for rifles designed for military use--SC	-
951.0930	730.8240	Parts for machine guns and other military firearms having a bore diameter of 30-mm. or less--SC	-
951.0940	730.8260	Parts for missile and rocket launchers; flame throwers; etc. and similar military projectors, except howitzers and mortars--SC	-
951.1000	818.6000	Military equipment not identified by kind--SC	-
952.0000	818.5000	Military wearing apparel of all types and materials including footwear and headwear--SC	-

- Represents no unit of quantity required.

*Arbitrary 5-digit Schedule E is the same as 5-digit level of SITC, Revision 2.

[1]Arbitrary code same as the true 5-digit code, but with different coverage.
[2]Represents shipments of food, n.s.p.f., for relief or charity by individuals and private agencies.
[3]Represents shipments of medicinal and pharmaceutical products for relief or charity by individuals and private agencies.
[4]Represents shipments of relatively insignificant parts of other machine-tools for working metal or metal carbides, n.s.p.f.
[5]Represents shipments of relatively insignificant parts of metal-forming machine-tools.
[6]Represents shipments of parts for boats, n.s.p.f.
[7]Represents shipments of new clothing for relief or charity by individuals and private agencies, and all used clothing for relief or charity, whether exported by individuals, private agencies, or government agencies.
[8]Represents shipments of works of art, n.s.p.f.
[9]Represents shipments valued under $250, estimated.
[10]Represents shipments of military equipment not identified by kind.
[11]Represents shipments of military wearing apparel.

*Arbitrary 5-digit Schedule E is the same as 5-digit level of SITC, Revision 2.

[1] Arbitrary code same as the true 5-digit code, but with different coverage.
[2] Represents shipments valued under $250, estimated.
[3] Represents shipments of food, n.s.p.f., for relief or charity by individuals and private agencies.
[4] Represents shipments of medicinal and pharmaceutical products for relief or charity by individuals and private agencies.
[5] Represents shipments of relatively insignificant parts of metal-cutting machine tools and other machine tools for working metal or metal carbides, n.s.p.f.
[6] Represents shipments of relatively insignificant parts of metal-forming machine tools and other machine tools for working metal or metal carbides, n.s.p.f.
[7] Represents shipments of parts for boats, n.s.p.f.
[8] Represents shipments of new clothing for relief or charity by individuals and private agencies, and all used clothing for relief or charity, whether exported by individuals, private agencies, or government agencies.
[9] Represents shipments of works of art, n.s.p.f.
[10] Represents shipments of military equipment not identified by kind.
[11] Represents shipments of military wearing apparel.

*Arbitrary 5-digit Schedule A is the same as 5-digit level of SITC, Revision 2.

[1] Represents shipments of crude aluminum oxide abrasives.
[2] Represents shipments of relatively insignificant parts of metal-cutting and metal-forming machine tools.
[3] Represents shipments of parts for boats, n.s.p.f.
[4] Represents shipments of works of art, n.s.p.f.
[5] Represents shipments valued under $250, estimated.

*Arbitrary 5-digit Schedule A is the same as 5-digit level of SITC, Revision 2.

[1] Represents shipments of crude aluminum oxide abrasives.
[2] Represents shipments of relatively insignificant parts of metal-cutting and metal-forming machine tools.
[3] Represents shipments of parts for boats, n.s.p.f.
[4] Represents shipments of works of art, n.s.p.f.
[5] Represents shipments valued under $250, estimated

[1]Symbols used in the 6-digit SIC-based export numbers represent combinations of two or more whole 5-digit SIC product classes as follows:

A--All within the same four-digit class.

B--All within the same three-digit but some different four-digit classes.

C, H--All within the same two-digit but some different three-digit classes.

D, J--All within the same division but some different two digit classes

E--Within different divisions.

X--All five-digit classes with the same three- or four-digit are included; A, B, C, in the five-digit for numbering sequence only.

[2]Export data in this detail are not available.

[3]"X" does not indicate a combination and is used only as an instrument to obtain the desired numbering sequence.

[4]Part of this SIC-based output product code is assigned to other SIC-based export product codes.

[1]Symbols used in the 6-digit SIC-based export numbers represent combinations of two or more whole five-digit SIC product classes as follows:

A--All within the same four-digit class.
B--All within the same three-digit but some different four-digit classes.
C,H--All within the same two-digit but some different three-digit classes.
D,J--All within the same division but some different two-digit classes.
E--Within different divisions.
X--All five-digit classes with the same three- or four-digit are included; A, B, C in the five-digit for numbering sequence only.

[2]Export data in this detail are not available.
[3]"X" does not indicate a combination and is used only as an instrument to obtain the desired numbering sequence.

Appendix G. Principal Differences Between the SIC-Based Output and Import Product Codes

[1]Symbols used in the six-digit SIC-based import numbers represent combinations of two or more whole five-digit SIC product classes as follows:

A--All within the same four-digit class.
B--All within the same three-digit but some different four-digit classes.
C,H--All within the same two-digit but some different three-digit classes.
D,J--All within the same division but some different two-digit classes.
E--Within different divisions.
X--All five digit classes with the same three- or four-digit are included; A, B, C in the five digit for numbering sequence only.

[2]Import data in this detail are not available.
[3]"X" does not indicate a combination and is used only as an instrument to obtain the desired numbering sequence.
[4]Part of this SIC-based output product code is assigned to other SIC-based import product codes.

[1]Symbols used in the six-digit SIC-based import numbers represent combinations of two or more whole five-digit SIC product classes as follows:

A--All within the ssme four-digit clsss.
B--All within the same three-digit but some different four-digit clssses.
C,H--All within the same two-digit but some different three-digit clssses.
D,J--All within the ssme division but some different two-digit classes.
E--Within different divisions.
X--All five digit clssses with the same three- or four digit sre included; A, B, C in the five-digit for numbering sequence only.

[2]Import data in this detail are not available.
[3]"X" does not indicate a combination and is used only as an instrument to obtain the desired numbering sequence.
[4]Part of this SIC-based output product code is assigned to other SIC-based import product codes.

1979 Classifications and Cross-Classifications

REVISIONS

For your convenience in identifying any changes in the classification systems for 1979, this section summarizes commodities which became obsolete during the year and those which replace them. The concordances between SIC-based product codes and import/export commodity numbers show all existing codes for the year 1979.

Table 1. 1979 Revisions in Schedule B Export Classifications Correlated With Agricultural, Nonagricultural, Schedule E, SITC, FT 990, and End-Use Codes

(Unless otherwise noted, revisions reflect changes effective January through December only.)

Type of change	Schedule B number	Commodity description	Unit of quantity		Agric. or non-agric. code	Schedule B number	True SITC code	FT 990 code	End-use code
			1st unit	2nd unit					
New	121.0515	Bovine leather, rough, russet or crust, wet blue, not split	Po.		1	611.4015	61140	240	1271
Old	121.0520	Bovine leather, rough, russet and crust, wet blue grains	Lb.		1	611.4020	61140	240	1271

Reads Should read	748.2900	Grains, grasses or other natural plants, dried, colored, etc., for ornamental use	–		1	292.7040	29270	100	4011 4114
Reads Should read	748.3300	Bouquets, wreaths and similar articles made from grains, grasses or natural plants	–		1	292.7050	29270	100	4011 4114

– Represents no unit of quantity required.

[1]End-use code change effective August 1979.

[2]End-use code change effective July 1979.

[3]This is still a good number. Effective January 1979, it excludes organic chemical mixtures.

[4]This is still a good number. Effective January 1979, it excludes basic slag.

[5]This is not a new number; it was in effect during 1978. However, effective January 1979, it includes natural fertilizers of mineral origin, n.s.p.f.

[6]This is not a new number; it was in effect during 1978. In 1978, Schedule B numbers 404.2240 and 487.3050 were covering the same commodities.

[7]These are still good numbers. Effective January 1979, they exclude best exchange-ex.

[8]This is not a new number; it was in effect during 1978. It includes sole stitching machinery and parts.

[9]This is still a good number. Effective January 1979, it excludes oil and gas field wire line and down-hole equipment and parts thereof.

[10]This is still a good number. Effective January 1979, it excludes ultrasonic cleaning equipment and parts.

1978 Classifications and Cross-Classifications

REVISIONS

For your convenience, the concordances between SIC-based product codes and import/export commodity numbers show all existing codes for the year 1978.

Table 1. Conversion of the 1978 Schedule B to a Classification System Based on the 1977 SIC

Part A. SIC-Based Export Product Code, Showing the Assigned Schedule B Numbers
